

# Shashank Kumar Shankar

---

Bellevue, Washington · 469-826-1417 · [shank4804@gmail.com](mailto:shank4804@gmail.com) · [shashankkumar.me](http://shashankkumar.me) · [linkedin.com/in/shank7485](https://linkedin.com/in/shank7485)

## Summary

---

Senior Product Manager with 9+ years spanning product management and software engineering at Microsoft Azure, AWS, Workday, and Intel. Led the 0-to-1 build and commercialization of Azure Storage Actions - now automating data management for 300+ global enterprises handling 2B+ objects. Blend deep familiarity with distributed systems and prototyping GenAI/LLM agent design to ship platform capabilities, craft monetization models, and guide cross-functional teams from concept through global launch.

## Core Competencies

---

- PaaS & Serverless Platform Development · Distributed Systems · LLM/Agentic Product Design
- Enterprise Customer Discovery · Pricing & Monetization Strategy · Go-to-Market
- Cross-Functional Leadership · Technical PRD & Roadmap Ownership

## Experience

---

### Microsoft Azure — Senior Product Manager, Azure Blob & Data Lake Storage (Redmond, WA) · Jan 2022 – Present

- Launched [Azure Storage Actions](#), a monetized serverless automation platform now used by 300+ enterprises to orchestrate petabyte-scale storage operations across 2B+ objects, delivering consecutive MoM revenue growth for Azure Storage.
- Led discovery with 20+ Fortune 500 customers and authored 20+ technical PRDs translating complex data automation gaps into roadmap commitments adopted by engineering, design, and compliance partners.
- Built the pricing and metering model via margin & sensitivity analysis, aligning finance, marketing, and field sellers on a sustainable consumption strategy ahead of public preview and GA.
- Evangelized Storage Actions across Microsoft MVP briefings, Azure Connected, and partner councils —driving GA launch readiness and accelerating solution architect enablement.
- Prototyped a GenAI-powered data management agent using ReAct framework and Azure Copilot; the PoC became the blueprint for the team's NL workflow investments.
- Introduced AI-assisted product operations (ChatPRD, Azure Copilot) and mentoring programs that compressed specification-to-execution cycles and scaled onboarding for new PM hires.

### AWS SageMaker Ground Truth - Software Development Engineer II (Palo Alto, CA) · Feb 2020 – Jan 2022

- Delivered the LIDAR 3D [point-cloud labeling](#) feature powering autonomous vehicle programs with scalable annotation workflows and automated quality controls.

- Engineered backend services for the launch of [Ground Truth Plus](#), showcased at [AWS re:Invent 2021](#), expanding managed labeling coverage for enterprise ML teams.

## **Workday — Software Development Engineer III (Pleasanton, CA) · Oct 2018 – Feb 2020**

- Built multi-region microservices and compliance capabilities that enabled Workday's geographic expansion; created Kubernetes operators adopted by multiple platform teams for consistent deployments.

## **Intel — Cloud Software Engineer (Hillsboro, OR) · Jul 2016 – Sep 2018**

- Contributed to open-source cloud orchestration projects that increased on-prem CPU adoption and represented Intel in industry working groups.

## **GenAI Personal Projects & Thought Leadership**

---

- **FashionMateAI**: GPT-4o + LlamaIndex wardrobe assistant combining multi-turn memory with retrieval-augmented personalization. [Demo](#)
- **Remainder.AI**: Designed and created AI reminder assistant that intelligently schedules multi-stage email reminders from natural language input. Implemented using GPT-5, function calling and architected evals framework with AI-as-judge methodology.
- **ServiceOpsAI**: Agentic LLM co-pilot leveraging RAG, function calling, and structured reasoning to help SREs triage incidents in minutes instead of hours. Slides: [ServiceOpsAI Deck](#)
- **CareersChatAI**: LLM-driven career guidance platform translating user intent into curated resources and action plans. [Demo](#)
- **GoingVC Partners Thesis**: Research on how GenAI reshapes workstreams, talent models, and value capture in the enterprise. Program: [GoingVC Partners](#) · Thesis: [PDF](#)

## **Education**

---

- **M.S., Telecommunications Engineering** — The University of Texas at Dallas (2014–2016)
- **B.E., Telecommunications Engineering** — VTU Bangalore, India (2010–2014)

## **Continued Education**

- **Stanford Continuing Studies — Generative AI for Product Managers** (Mar 2025): LLM foundations, AI data strategy, and ServiceOpsAI capstone.
- **Stanford Continuing Studies — Large Language Models for Business with Python** (Mar 2024): RAG architectures, fine-tuning workflow, FashionMateAI capstone.
- **GoingVC Venture Capital Program, Cohort 12**: Thesis on GenAI's impact on future of work and emerging business models.

## **Technical Skills**

---

Python · Golang · Java · TypeScript · C · Bash · LLM RAG (LlamaIndex) · Azure Copilot · Agentic LLM Orchestration · Prompt Engineering · Microsoft Azure · AWS · Kubernetes · Linux · SQL · Git · Data analytics with Kusto KQL · PowerBI
